

Cedric Jadin

Experience

July 2025 – Oct 2025

Full-Stack Software Developer (Internship) | Visual1 Development

Developed modular web solutions using PHP (Laravel), Statamic CMS, and Tailwind CSS for a digital agency serving 80+ brands. Created production-ready add-ons including a configurable Search module and Font Awesome Icon integration. Delivered live production website for Veteran Benefits Australia using Git, Bitbucket, Jira, and AWS in an Agile environment.

Nov 2022 – Jan 2024

Full-Stack Software Developer | InkPay Pty Ltd

Developed and maintained web applications using PHP (Laravel), JavaScript (Vue.js), HTML, CSS (Bootstrap/Tailwind), and MySQL. Built RESTful APIs, integrated Stripe payment processing, performed unit testing (PHPUnit), and deployed applications using AWS/Vapor.

Mar 2017 – Aug 2019

Full-Stack Software Developer | University of Liège, Belgium

Implemented IT management systems and provided technical support. Built web applications using J2EE (Struts 2), HTML, CSS, JavaScript, and jQuery. Designed and developed an accessibility platform streamlining accommodation requests for students with disabilities.

Feb 2016 – Mar 2017

ICT Support Manager | Tricobel SA, Belgium

Provided software and hardware support for a retail network of 50+ stores. Developed Windev applications, managed server infrastructure, optimized network efficiency, and handled database implementation and firewall/security engineering.

Feb 2015 – May 2015

Software Developer (Internship) | FN Herstal, Belgium

Performed software development and analysis for weapons systems quality assurance processes, utilizing Python for testing and automation.

Education

Master of Information Technology | Griffith University, Gold Coast, Australia

| Jul 2024 – Jun 2026

Software Development and Support Major

Coursework: Database Management (SQL), Cyber Security, Application Systems, Game Development (Unity), Software Development (Java), Web Development (Laravel, Bootstrap, Tailwind), Introduction to Artificial Intelligence.
